**Workboats**

Series of custom-made vessels designed by sea workers for sea workers

Based on our unique approach to shipbuilding, iXblue shipyard offers a comprehensive range of pilot boats, workboats, daughter boats for wind farms, as well as survey and polyvalent vessels of various sizes.

**iXpilot 40**  
Pilot boat

**iXwork 40 WF**  
Daughter boat

**iXship 50**  
Polyvalent workboat

**iXcat 80**  
Survey boat

**iXcraft 80**  
Multi-mission craft

### FEATURES

- Composite construction methods
- Vacuum infusion
- Moulding process (timely construction, perfected shaping process)
- Choice of propulsion (azimuthal pods, traditional, waterjets, hybrid)

### BENEFITS

- Corrosion free (low maintenance)
- Lighter vessels requiring smaller engines for the same performance and lower fuel consumption
- Innovative solutions for lifting equipment
- Possibility to have an “all iXblue” ship (equipment) through one supplier
- Architecture open to 3d party suppliers

### MAIN REFERENCES

- King Abdul Aziz University (Jeddah)
- French Navy
- French Administration (Survey, DRASSM)
- Nederlands Waterway (Aguabus)
- Toulon Harbour Pilot Station (France)
- New Caledonia Pilots
- French Administration (Sea Training DGA)
- La Reunion Pilots
- CMN
- iXblue Survey Division

### Proven track record

iXblue has always had excellent feedback from its customers with several long standing relationships. Shipbuilding is no exception. We stay connected even after delivery. Our goal is to keep improving our process and products. And it’s working.

### Known in the shipbuilding industry

- We offer sea-proven series
- Our custom designs are based on sea proven key elements (including the hull)
- All our ships are IACS approved
- Our ships are built in France
- You are included in every step of the design and building phases.

### From sea shores to the high seas

iXblue shipyard provide you workboats in the fields of:

- Harbour marine work
- Piloting
- Energy and offshore construction
- Geosciences
- Fishing
- Commercial shipping

## Workboats at a Glance

To build our workboats to the highest standard, we utilize our leading expertise in vacuum infusion. Combined with a moulding process and the use of GRP, we build enduring and efficient vessels, when combined, gets the job done.
