

# Echoes 3500 T1-T3

## High-resolution sub-bottom profiler

Echoes 3 500 offers high-resolution seismic reflexion data to characterize sedimentary architecture and geological features. Echoes 3 500 is available with one (T1) or three (T3) transducers, allowing a wide range of operational conditions from shallow to deep ocean environments. Echoes 3500 systems enable river, lake and ocean surveys regardless of the seabed topography.
