

FIBER BRAGG GRATING

# IXC-CLFO-LN-2-PM

## Single Frequency DFB Laser

For distributed feedback single-frequency fiber laser

Exail's single-frequency fiber lasers are based on UV Bragg grating technology applied to active rare-earth photosensitive fibers. Ultra short cavity length and phase-shifted design permit ultra-narrow linewidth and robust mode-hop-free laser source properties, ideal for various sensor applications.

### Benefits & Features

- Narrow-linewidth
- Single longitudinal mode
- Mode-hop-free
- Linear polarization
- Low intrinsic phase noise
- WDM compatible
- Low optical feedback sensitivity
- Wavelength range 2 μm

### Applications

- Acoustic sensing
- Hydrophone
- Cold atom
- Interferometry
- Spectroscopy
