IXF-2CF-EY-PM-15-160

Double Clad Polarization-Maintaining Er/Yb Co-Doped Fiber

IXF-2CF-EY fibers are double clad Erbium-Ytterbium co-doped fibers. The core composition has been carefully selected in order to get high efficiency and low 1 μm emission ratio, which are the recognized trade mark of Exail Erbium-Ytterbium co-doped fibers developed over the past 10 years.

PM design of this fiber is Panda type which make it easy to be recognized by splicing machines.

Dual coating with low index primary layer.

For easy integration, matching passive fibers are available as well as pump combiners.
