OPP-LAB-CBand

Optical Pulse Picker LAB in the C-Band

The Exail OPP-LAB-CBand is a family of Optical Pulse Picker based on MXER LiNbO₃ Mach-Zehnder modulators and original bias controller. The module operates in the full C-Band, and the best extinction ratio is reached at a chosen (user supplied) wavelength from the ITU-Grid. It allows from a continuous laser source to generate an optical modulated signal, and from a pulse seeder source to pulse pick and reduce its repetition rate.

The short optical pulse generation or picking is based on a large bandwidth and high extinction ratio external LiNbO₃ modulator. For superior extinction ratio above 40 dB, the OPP-LAB embeds a cascaded modulators set-up.

An innovative automatic bias control circuitry (MBC) guarantees bias point stability over time whatever the power and the mode of the input optical signal, whether continuous or pulsed. This MBC is intended to operate at a chosen wavelength from the ITU-Grid to be specified.

FEATURES

- Turn-key optical pulse picker
- High optical stability over time
- Low rise & fall times
- Very high extinction ratio
- Proven solution

APPLICATIONS

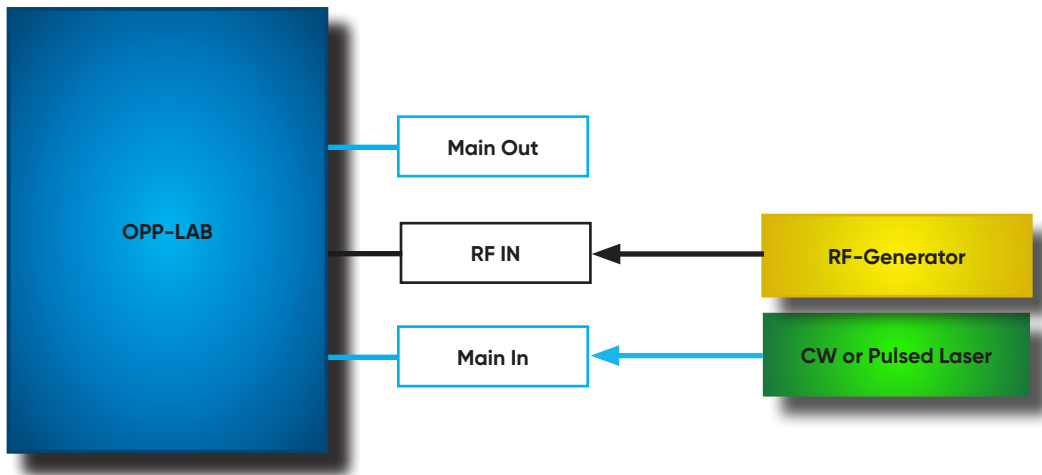

- Pulse picking and optical modulation
- Laser operation

PERFORMANCE HIGHLIGHTS

Parameter	Nominal
Operating wavelength	Full C-Band
Pulse contrast	40 dB / 80 dB
Insertion loss	6 dB / 12 dB

FUNCTIONAL BLOCK DIAGRAM

The OPP-LAB integrates:

- a modulator set to ensure a very high optical pulse extinction ratio and flexible pulse shaping,
- an automatic Modulator Bias Control circuitry (MBC) to guarantee high extinction ratio stability over time.

The OPP-LAB is connected to an external optical laser source and an external electrical generator.

ORDERING INFORMATION

Exail Photonics produces specialty optical fibers and Bragg gratings based fiber optics components and provides optical modulation solutions based on the company lithium niobate (LiNbO₃) modulators and RF electronic modules. Exail Photonics serves a wide range of industries: sensing and instruments, defense, telecommunications, space and fiber lasers as well as research laboratories all over the world.
