

SPECIALTY OPTICAL FIBER

IXF-SM-1550-125-019-AL

Single Mode Fiber

The IXF-SM family includes singlemode fibers designed for use in harsh environments with extreme temperatures and/or low to moderate radiation levels. Exail offers a wide range of polymer and metallic coatings well-suited for high-temperature applications.

Aluminum coated fibers offer a wide operating temperature range, from cryogenic temperatures up to +400 °C. They are also hermetic to hydrogen, mitigating hydrogen darkening in hydrogen-rich environments.

The IXF-SM-1550-125-019-AL fiber is radiation tolerant and can be used under low to moderate radiation levels.

Benefits & Features
